Blockchain Developer Trainee

Experience

QuadB Technologies

Feb 2025 - March 2025

WFH

- Developed and deployed small-scale projects on the Internet Computer Protocol (ICP).
- Explored smart contract development using Motoko and Rust.
- Gained hands-on experience in decentralized application (dApp) development.

Projects

PradhanFresh | TypeScript, React, Node.js, PostgreSQL, Prisma GitHub

- Built a full-stack e-commerce platform for fresh produce delivery, solving farm-to-home delivery inefficiencies.
- Implemented secure authentication, dynamic inventory management, and scalable backend with PostgreSQL + Prisma.

QuantumTicket | Solidity, React, Ethers.js, NFT, Vite GitHub

- Created a decentralized event ticketing system to eliminate fraud using NFT-based tickets.
- Enabled royalty-based resale with secure smart contracts and on-chain QR verification.

TokenVault | React, Ethers.js, Solana Web3.js, Multi-Chain APIs GitHub

- Developed a multi-chain portfolio tracker for 8+ blockchain networks with real-time token analytics.
- Integrated APIs for Ethereum, Polygon, Solana, Arbitrum and automated token detection.

Achievements

- Led a team to victory in the Avalanche Bootcamp at Centurion University.
- Ranked 5th in the Agoric Hackathon, demonstrating strong problem-solving abilities.
