

Subhajit Pradhan

Software Engineer - Developer Tools, AI Systems, Full Stack

subhajitpradhan310@gmail.com | github.com/subhajitlucky | linkedin.com/in/subhajitlucky | subhajitpradhan.vercel.app

Software engineer building developer tools, AI workflows, and full-stack systems with clear data boundaries, inspectable architecture, and source-backed tradeoffs.

EXPERIENCE

Giakaa Capital May 2026 - Present

Full Stack Software Developer

- Designed and shipped full-stack features with Next.js, TypeScript, and PostgreSQL in a startup product environment.
- Built backend APIs and job-processing systems, then diagnosed production issues and optimized database queries.
- Implemented authentication, role-based access control, caching, and analytics across frontend and backend services.

uElement Technologies Jan 2026 - May 2026

Software Developer Intern

- Architected modular Next.js applications with performance-focused rendering and backend API boundaries.
- Built blockchain-integrated workflows with smart contract interactions and transaction monitoring.

QuadB Technologies Feb 2025 - Mar 2025

Software Engineering Trainee

- Built and deployed Internet Computer smart contracts with Motoko and Rust, then developed canister-backed applications.

SELECTED ENGINEERING

RLS Doctor GitHub | npm

TypeScript, Node.js, PostgreSQL

- Built a read-only Postgres/Supabase RLS auditor that reports disabled RLS, broad policies, missing WITH CHECK clauses, and hardening gaps for local and CI review.
- Packaged an installable Agent Skill and added GitHub Actions plus disposable Postgres integration coverage.

SmritiFlow GitHub | npm

TypeScript, Node.js, pnpm

- Built a repository-memory CLI that generates cache, project-map, scan-report, AGENTS.md, and docs/ai artifacts for coding-agent handoffs.
- Implemented init, scan, refresh, status, and resume workflows with tests and repo-hosted Agent Skill packaging.

Tarka Sabha GitHub | Live

Next.js, TypeScript, PostgreSQL, Prisma

- Built a multi-agent debate platform with configurable personas, multi-provider routing, and sequential or mention-aware orchestration.
- Encrypted provider API keys at rest with AES-256-GCM and separated workflow state from provider-specific calls.

CSCosmos GitHub | Live

React, TypeScript, Vite, React Router

- Built a typed computer-science learning hub with domain/topic routes, search, live versus coming-soon states, and links to focused microsites.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, Rust, SQL, Java, C++

Web: React, Next.js, Node.js, Express.js, REST APIs, GraphQL, Tailwind CSS

Data and infra: PostgreSQL, Prisma, MongoDB, Docker, Git, GitHub Actions, Linux, Vercel

AI and blockchain: OpenAI, Anthropic, Gemini, AI SDK, Ethereum, ICP, Solidity, Ethers.js

EDUCATION

Centurion University of Technology and Management, Bhubaneswar Oct 2022 - Apr 2025
CGPA: 8.9

Bachelor of Computer Applications
