Bhubaneswar, India

Experience

Giakaa Capital

May 2026 – Present

Full Stack Software Developer

Remote

- Build and ship full-stack features in Next.js, TypeScript, PostgreSQL/Supabase, and ClickHouse across web, API, and analytics layers.
- Develop backend APIs and background job processing on Google Cloud Platform, with authentication, role-based access control, caching, and dashboard data pipelines.
- Debug production incidents, optimize SQL queries, and clear performance bottlenecks in live services, verifying fixes with tests and staged rollouts.

uElement Technologies

Jan 2026 – May 2026

Software Developer Intern

Remote

- Built Next.js applications with modular backend design and performance-focused rendering.
- Integrated smart contract interactions and transaction monitoring into production systems.

QuadB Technologies

Feb 2025 – Mar 2025

Software Engineering Trainee

Remote

- Built and deployed Internet Computer (ICP) smart contracts in Motoko and Rust; developed canister-backed dApps.

Projects

Codebase Doctor – Repository Auditor for Humans and Coding Agents

TypeScript, Node.js, MCP, SARIF · [npm](#) | [GitHub](#)

- Published npm CLI and MCP server with a full test suite; CI installs the packed tarball to verify each release.
- Audits secrets (working tree and Git history), dependencies (npm/pnpm/Yarn/Bun + OSV advisories), PostgreSQL RLS, Dockerfiles, and GitHub Actions.
- Builds a multi-language source graph across JS/TS, Python, Go, Java, and Rust for impact analysis and missing-target detection.
- Reports findings with stable fingerprints and baselines so CI separates new issues from known ones; outputs text, JSON, or SARIF.

RLS Doctor – Postgres and Supabase Row Level Security Auditor

TypeScript, PostgreSQL, Supabase · [npm](#) | [GitHub](#)

- Published npm CLI that audits RLS policies, grants, and role-membership paths from live catalog metadata.
- Probe mode impersonates application roles in rolled-back read-only transactions, including simulated JWT users, to prove cross-tenant row reads without changing the database.
- Ships SARIF output, baselines, and a GitHub Action for pull-request checks.

CSCosmos – Interactive Computer-Science Learning Hub

Next.js, TypeScript, React · [Live](#) | [GitHub](#)

- Searchable learning hub with interactive modules across web, systems, security, AI, and infrastructure.
- Typed topic catalog drives search, domain routes, and live/planned module states from one source.
- Combines native visualizers with focused external microsites; topic pages are statically generated.

Tarka Sabha – Multi-Agent AI Debate Platform

Next.js, TypeScript, PostgreSQL, Prisma · [Live](#) | [GitHub](#)

- Multi-agent debate platform that routes multiple LLM providers with configurable personas; API keys encrypted with AES-256-GCM.

CampusHelper – Campus Lost-and-Found Platform

Next.js, TypeScript, Prisma, PostgreSQL, Supabase · [Live](#) | [GitHub](#)

- Full-stack lost-and-found platform with authentication, image uploads, and searchable item reports; designed Prisma schemas and optimized PostgreSQL queries.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, C++, Rust, Solidity

Frontend & Backend: React, Next.js, Tailwind CSS, Node.js, Express, REST APIs, PostgreSQL, Prisma, MongoDB

AI & LLM: OpenAI, Anthropic, and Gemini APIs, AI SDK, LLM tool-calling, MCP (Model Context Protocol)

DevOps & Cloud: Docker, GitHub Actions, Linux, CI/CD, Vercel, Railway

Blockchain & Web3: Ethereum, Solidity, Hardhat, Ethers.js, Internet Computer (Motoko)

Education

Centurion University of Technology and Management, Bhubaneswar

Bachelor of Computer Applications

Oct 2022 – Apr 2025

CGPA: 8.9
